

## Pure Hydrogen's H2X releases POWER H<sup>2</sup> portable electricity power units

- Four Power H<sup>2</sup> units supplied with standard sizes of 5kw, 20kw, 50kw and 100kw capacity
- The units have no emissions and use hydrogen as fuel to generate electricity
- Can be used either as a back-up power source or continuous electricity supply;
- Customers being engaged now for first sales Q1 2022
- Pure Hydrogen currently working with industrial users to supply back-to-base fueling solutions; off-take agreements and vehicle supply

**Sydney: 7<sup>th</sup> December 2021**, Australian East Coast Clean Energy Company Pure Hydrogen Corporation Limited (ASX: PH2 or 'Pure Hydrogen') pleased to announce that in conjunction with H2X Global Limited ("H2X") (a company that has a 24% stake with options to increase to 48%), that it has launched a range of hydrogen fuel cell power generation units – Power H<sup>2</sup> that can supply electricity without any emissions using Hydrogen fuel.

A photo of the powerH2 unit

Power H<sup>2</sup> units have four standard sizes being 5kw, 20kw, 50kw and 100kw capacity are being supplied and will be available for sale in Q1 2022, or in less than four weeks. The Power H<sup>2</sup> units can be used for a variety of purposes such as back-up power and/or supply to powering mobile communication towers, businesses, hospitals, households, farms and mine sites. The Power H<sup>2</sup> unit is powered by a Hydrogen Fuel Cell and a small hydrogen storage tank for hydrogen fuel storage.

**Managing Director Scott Brown commented:** *“The Power H<sup>2</sup> units have at their heart hydrogen fuel cells and powertrain that have been developed over several years. Customers are now being engaged. The Power H<sup>2</sup> units demonstrate H2X’s ability to bring hydrogen-powered products to market successfully given their strong technology skills and established manufacturing and logistics supply chain which helps to bring product to market efficiently. Their technology is at the forefront of the hydrogen revolution and it is great to see it being implemented commercially.”*

Following is a link to a video of the Power H2 unit.
